# Now

Now it's the time.

The utilitarian cyclists may still feel like a minority trying to push an immense mass of people up the hill. However, it seems like they're finally gaining the momentum required for the next gear up.

The industry is sensing a sizeable growth of the non-recreational market. The signs show that, for the first time in decades, the bicycle is being taken seriously again as a means of transportation. Even though, cycling is still growing in popularity as a sport, the numbers are leveling off. It's true that the recent economical qualms played a part in this course of events, but it's up to us, bicycle fans, to seize this wake-up call.

Now it's the time to be ground-breaking. As the new generations start looking at cycling as a sensible lifestyle option, the industry has the duty of encouraging them with more reasons. We need to highlight how much the bicycle can be a sustainable and guilt-free proposition.

For Polisport, it means questioning the process, the design and the materials. In this year's product line-up you'll notice we've employed some new and revolutionary materials and techniques to build more ecological products and to make the industrial process cleaner. This is starting a change in the way we work but, more importantly, we hope to be a leader in changing our industry, that will make an impact for the future generations.

### ↳ HARNESS BUCKLES

There's no such thing as too much safety. That is why Polisport designed its own harness buckles. These buckles were engineered and tested to endure tensions well over those generated by the weight of the baby. The design of the buckle requires three buttons to be pushed simultaneously to unbuckle. This makes it impossible for a child to release the harness without help.

### ↳ FRAME MOUNTING HOLDER

It doesn't matter how well designed a baby seat is. If it is not properly attached to the bike it is not safe. Polisport as devoted all the time, knowledge and effort needed to develop the safest holder. Thoroughly engineered, this holder provides an extremely stable and tight mounting and yet is small enough not to bother the rider when the baby seat is not in use. The cable guides and rubber padding, also protect the bike.

### ↳ EASY SLIDE SYSTEM

The easy and comfort of use is as important for a child as it is for a parent. That is why Polisport has developed the Easy Slide System. On baby seats equipped with this solution, it is possible to move the seat backward and forward without using any tools. Its simplicity makes it easier to adjust and easier to seat the child.

### ↳ QUICK SAFETY TURN

We like to make things simple. That's why we don't like to depend on tools to make small adjustments to the baby-seat. QST is a specially designed screw with a safety button that allows immediate adjustments to the positioning, and assemble, of the seat while offering a totally safe and tight mounting. With QST you don't need to use any tools.

### ↳ RECLINABLE SYSTEM

Children are not all the same. Some are taller, some are quieter and some enjoy long rides. This reclining system allows a movement of up to 20° to help each child to find his/her favorite position.

## REGISTERED DESIGN

For each new baby seat developed many hours were spent perfecting its shape. That is why all our models have registered design. But beyond seat shapes, there are functional solutions that were meticulously designed to take safety, comfort and functionality to the highest standards.

## FRAME MOUNTING SYSTEM

Polisport's Frame Mounting System was developed to be safe, simple, reliable, efficient and easy to use.

The double ratchet and click system has a very smooth action when mounting the chair, sliding easily into the slots and requiring no more pressure than the weight of the seat.

At Polisport we love bicycles so we developed the mounting system in order to avoid any scratch on the frame.

Inside the holder a rubber pad protects the bicycle and allows the mounting system to adapt to frames of all shapes and sizes.

The rear part of the frame mounting system has an opening to allow the cables to fit in without getting pinched.

This mounting system allows the chair to be moved backwards and forwards to adjust to the size of the child.

The mounting arm filters some of the rolling vibrations, making it comfortable for the child, while the additional safety belt straps the chair to the frame.

It takes only a light push of the button to release the baby-seat.

# DESIGN SAFETY AND COMFORT

▸ Note:  
Polisport do not supply  
the bicycle luggage  
carrier, only supplies the  
CFS (Carrier Mounting  
System)

## ▸ CARRIER MOUNTING SYSTEM

Polisport's Carrier Mounting System was developed to take advantage of bikes equipped with luggage carriers.

Mounting the baby-seat to the luggage carrier is very simple and effective.

The bottom of the seat is tightly attached to the carrier which is also firmly attached to the frame. This solution increases stability which is important for the rider.

This system, which uses QST technology, doesn't require any tools to mount the seat so it's easy to transfer it from one bicycle to another.

The Carrier Mounting System can also be moved backward and forward to adjust to any bike and child size.

# We Dream

We dream of a perfect future. Everyone does. But those who refuse to wait, just go out and build it. Do your part. Jump on a bike and enjoy. Riding a bicycle is not a statement. It's a gift to your generation and beyond. Ride for the future and with it. Baby seats are the first link between the future generations and the bicycle. That's only one of the reasons why we take them so seriously.

# We Sow

We sow the seeds for a new cycling generation but we also have to raise and protect them. There's more to cycling than just pedaling. Riding your first bike is a lesson about freedom, responsibility and confidence. The safety helmet is like the caretaker's invisible yet ever-present hand. Empowering and protecting. That's how we think of junior helmets and it shows.

# We Grow

We grow old as fast as we want when we are riding a bicycle. Whether you chose between cruising along a scenic road, commuting or tackling a mountain drop, you're making your life greater and longer. A life worth living. A life worth protecting. No matter how fast you wish to live and ride, we have a reliable helmet to suit you.

# We Care

We care about the Earth and everything it's made of. The water, the soil, the people. They all have their place and it's not necessarily together. To encourage real world cycling, we think a lot about mud guards because they are the mediator between you and your environment. We wish to keep you apart yet close enough. Whether you chose city, country or mountain, we've been there.

# We Have

We have the main role in the story of our planet. Humans depend and rely on it like all other species, but only humans have the power to change the course of events. We are committed to be the good character and that's why we're focused on green technologies that can really make a difference. We chose water bottles to start with, because, water is the most precious gift of nature. We want to show we care. We want to show we can.

# BOTTLES TECHNOLOGIES

promotional  
video

IF Design Award is a reputed competition held by the International Forum Design Hannover. The IF label is recognized all over the world as a warranty of design excellence. Corky water bottle was awarded this honor from the jury for the creation of a new material and use consisting of cork and plastic for its outer shell. Beyond just being innovative and functional, this technology allows a large reduction in the use of plastic and offers a better thermal performance of the bottle.

Mixture of plastic and cork  
**LESS PLASTIC FOR A BETTER ENVIRONMENT**

## ▼ CORK BOTTLES

The functional simplicity of the water bottle does not mean we cannot strive to improve it. Polisport is pioneering a green technological solution by using a mixture of plastic and cork in the production of water bottles. This translates into reduced use of plastic in favour of a natural raw material with better thermal performance. Cultivated and extracted using sustainable methods, the cork also adds lightness to the bottle while offering a pleasant touch and better grip.

In cooperation with

A member of

- Ecological and sustainable material.
- Reduction in CO2 emissions and fossil fuel usage.
- Complies with EN 71-1,2,3 and Directive 2002-72-EC
- Soft to the touch with a natural and hypoallergenic surface.
- EFSA and FDA approval as suitable for food contact.
- Complies with EN 71-1,2,3 and Directive 2002-72-EC.

**P**  
PATENT PENDING

Nature assimilates a bottle in less than 6 months  
**REALLY GREEN TECHNOLOGY THAT WORKS**

▼ 100% BIO-NATURAL

We want to make cycling an increasingly greener activity. So it's with pride that we present you with our special biodegradable bottles made from natural raw material. Being biodegradable means that nature can assimilate a disposed of bottle in less than six months without harming the environment or atmosphere. At the same time, by using natural raw material we also reduce the use of fossil fuel.

- Material derived from renewable sources.
- Fully biodegradable plastic that behaves like traditional thermoplastics.
- Bioplastic as defined by the European Bioplastics Association.
- Biodegradable Plastic as defined by the EN 13432:2000 and EN 14995:2006 standards.
- Reduction in the emission gases that cause the "green-house" effect.

**8644400008** - light green

master box 88 UN  
box dimensions 768 x 388 x 432

Anti microbial thermoplastic  
**RIDING HARD, DRINKING SAFELY**

▼ ANTI MICROBIAL

Intense use of the bicycle calls for better accessories. To avoid the well-known microbial problems associated with plastic water containers like odours and bad-tasting water, Polisport introduces the Anti Microbial bottle. By using anti microbial thermoplastic this bottle provides protection against harmful bacteria. It not only prevents the formation of new microbes; it also eliminates any existing ones in 24 hours. Keeping all harmful infections at distance, this is the most durable bottle on offer.

ref. - 700 ml  
**8644400007** light blue

master box 88 UN  
box dimensions 768 x 388 x 432

- PROTECTION = HYGIENE = HEALTHIER SPORTS
- This bottle releases ions which act against harmful bacteria (proven to kill >99.9%) complies with JIS Z 2801 and ISO 22196:2007.
- No unpleasant odours or flavours that microbial organisms can create.
- EFSA and FDA approved as suitable for food contact.
- Complies with EN 71-1,2,3 and Directive 2002-72-EC.

Vibrant colors and photographic definition  
**AMAZING GRAPHICS AND GREAT PROMOTIONAL POTENTIAL**

▼ SLEEVE BOTTLES

To enhance the customization potential of water bottles, Polisport presents a brand new product. Sleeve technology allows full 360° decoration with vibrant colors and photographic definition. The quality and flexibility of the bottle is not affected by the graphics and its customization is low-priced. Sleeve technology from Polisport can boost the promotional use of water bottles by cycling teams or companies.

ref. - 550 ml

▶ Polisport has developed a new POP (Point of Purchase) display for your store. We want to offer you a flexible solution where you can display, in a easy way, all our product range.  
Here you can see a standard solution where you can display all products, although the piece allows you to show Polisport products in the way it suits you better.  
For your own custom display that better suits your needs we can provide you with hooks for helmets and euroslot packages, so that you can order the quantities that you need.  
For example on the above display we used 17 Euroslot Hooks and 7 Helmets Hooks.

\* We also have chest protections hooks if needed for Downhill range (8981800003 - 5 Units)
