## Welcome to our world Welcome to uvex cycling

Our passion for cycling is clear in this year's innovative highlights. The range sparkles with new technology combined with stylish design. Our brand new uvex Core Range – our collection by Core Riders for Core Riders – inspires the young, active cycling scene.

uvex wishes you an enjoyable and successful bike season!

Rider: Max Schumann, Photographer: Colin Stewart

# protecting people

Our company policy is protecting people. We take this principle literally, since protecting people is our aim, as well as our motivation. And not just in sports and leisure activities. Many workplaces present a myriad of dangers too. uvex products provide protection across the board. As a result of our strategic safety concept, uvex offers “head to toe” protection. With innovative, proven, high quality products, which meet the highest safety standards. For over 80 years, people have relied on protection with uvex products. Every day, across a wide range of applications.

- a big responsibility and a noble task

## ➤ We have a vision

In the uvex world, we strive to be leaders in innovation, achieve worldwide value-oriented growth, and reach top place on the winner’s podium in all our fields of activity and market sectors!

- value follows innovation!

## ➤ We have a mission

The uvex brand is our commitment. The philosophy of protecting people is our mission. To this end we develop, manufacture and distribute products and services for the safety, and protection of, people at work, sports and leisure.

## Based in Germany – By Conscious Choice

Within truly global markets we have created a success story – with products that are Made In Germany. Not just a country of thinkers and theorists, it is the home of new ideas and inventors. Here in Germany, we explore and develop innovative new products, materials and processes. We have the know-how that ensures the high quality of our products. And we work to maintain this. With enthusiasm and passion. Every single day of the year.

## Certified Quality – Guaranteed Safety

As a global technology leader in the field of sports equipment, uvex sets high safety and quality standards. To achieve these standards all of our products undergo stringent quality checks before being introduced to the market. New products must pass the most rigorous examination before launch. Throughout the entire production process experts from our in-house test centre conduct material stress tests and many other safety tests. These ensure confidence in the product and assure our customers that purchasing uvex means top quality products.

”

“Bike helmets must comply with a broad range of requirements: safety of the rider must be guaranteed, even in extreme situations. The helmet must also satisfy high levels of ergonomics and wearing comfort. Materials used must be very durable but also very light. uvex has decades of experience in developing bike sports helmets and remains one of the major innovation drivers in this sector.”

“

Sigmund Piller, Product Development Manager

## Strap and lock test

Tests how the strap and buckle withstand an impact. Weights of 4 – 10 kg are dropped from different heights onto a pretensioned strap system. Only strap systems which are engineered to withstand such stress without being damaged are integrated into uvex helmets.

## Shock absorption test

The main purpose of a bike helmet is to protect the head during a fall or collision. It does this by greatly absorbing the force of the impact. The shock absorption test is passed only when a bike helmet can withstand a fall from a height of two meters.

## Stability test

A bike helmet only performs its task when it stays on the head during a collision. Stability tests conducted in our laboratory ensure a helmet has a secure fit, even when pulled down by a weight of 10 kg.

# Bike Helmet Technology (race 5 helmet pictured)

## DOUBLE-INMOULD TECHNOLOGY

An extra, second shell covers the lower helmet, creating even greater stability and protection.

## HIGH IMPACT SHELL

Highly impact resistant polycarbonate, originally developed for high-speed bike racing.

## ROLL-OVER-BAR

Offering maximum safety in the event of an impact.

## RANGE OF SHELL SIZES

- optimal fit

## REMOVABLE X-FIT HELMET LINER

- removable
- anti-allergenic
- washable
- moisture absorbing

### BASIC

Special anti-bacterial treatment.

### VENT

Special antibacterial finish. Perforated, embossed and strategically placed contact surfaces ensure maximum ventilation and optimal fit.

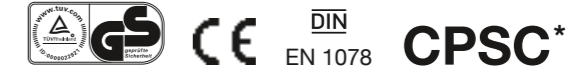

### CARBON

Bacteriostatic carbon fibres and a special antibacterial finish ensure long-lasting freshness and increase liner lifespan. Perforated foam and graduated embossing ensure maximum ventilation and optimal moisture management.

## STANDARDS

uvex bike and in-line skating helmets comply with the high safety requirements of the following standards:

## SIZE CHART

5XS	45 - 46 cm	S	55 - 56 cm
4XS	47 - 48 cm	M	57 - 58 cm
3XS	49 - 50 cm	L	59 - 60 cm
2XS	51 - 52 cm	XL	61 - 62 cm
XS	53 - 54 cm	2XL	63 - 64 cm

### IAS

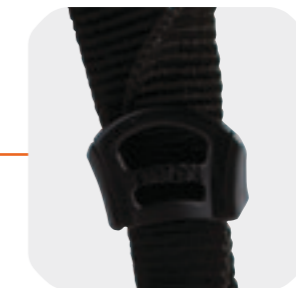

Enables you to single-handedly fine-tune the fit of the helmet to your head.

### IAS 3D+

Additional height adjustability.

### IAS 2K

Superlight width- and height-adjustable half-ring system made from 2 different materials.

### FAS CHIN STRAP SYSTEM

Progressive, easily adjustable chin strap system.

### MONOMATIC

The comfort closure. Simple multi-level adjustment with just one hand.

## DEVELOPMENT STORY

# DEVELOPED BY CORE RIDERS FOR CORE RIDERS

### uvex History

uvex is a family-owned company, founded in 1926, which has its headquarters in Germany. At the beginning of the 1930s we produced our first ski goggles in Fürth, Germany. The name "uvex" is an acronym for "ultra violet excluded." Since the 1960s our brand name has been a worldwide symbol for top quality, Made in Germany. Today uvex produces a comprehensive collection of ski goggles, helmets, protectors and sunglasses that offer top performance and optimal protection for sport, leisure and work.

### Development Story

In 2009 uvex brought together a team of freeskiing and freeriding experts. Working closely with the athletes, we developed a completely new range. Our inspiration? Creative design, sophisticated product features and excellent functionality, all combined with our passion. Rigorous testing and review by riders, engineers and product experts developed essential features for park and powder performance. Highly functional product features, creative product design and, Style. Because the fascination for jumps and tricks often continues on two wheels in summer, the Core Range jumps into the bike sector.

Athlete feedback is vital to our creative process. Rapid prototyping with our athletes led the range's development, inspiring key features. Test athletes selected favourite elements, helped make improvements and uvex engineers rolled these into further developments. What does a rider need to perform? What does she need when challenged by tough trails, dirt tracks and jumps? Our Core Riders encounter these situations all the time, so they are the perfect uvex development team. Our entire uvex team has developed a product range that is honest and authentic for the bike community. Developed by Core Riders for Core Riders.

CHECK OUT THE NEW UVEX G.GL 9 BIKE RECON READY

Rider: Magnus Baumann, Photo: stibezirk

## BENEFITS OF THE RECON SYSTEM

Check out the new uvex G.GL 9 bike recon ready. This goggle comes ready to fit the MOD multimedia GPS system from Recon Instruments. A mini LCD dashboard display on the lower edge of the lens enables you to monitor real-time data such as actual speed, altitude, distance travelled (up, down and sideways), jump airtime, distance, height and drop, or review the statistics history of different runs. An interactive online portal means you can share and exchange GPS data and information with your peers. The new G.GL 9 bike recon ready, developed in co-operation with Recon Instruments, has everything you need – packed with onboard electronics yet still ultra-lightweight.

Find out more about the Recon System, available separately, from [www.reconinstruments.com](http://www.reconinstruments.com)

## Certified Quality – Guaranteed Safety

As a global technology leader in the field of sports equipment, uvex sets high safety and quality standards. To achieve these standards all of our products undergo stringent quality checks before being introduced to the market. New products must pass the most rigorous examination before launch. Throughout the entire production process experts from our in-house test centre conduct material stress tests and many other safety tests. These ensure confidence in the product and assure our customers that purchasing uvex means top quality products.

### Climate Chamber

Sports activities expose equipment materials to harsh conditions, including extremes of temperature, moisture, UV radiation or mechanical loads. All uvex sports eyewear therefore undergoes comprehensive material tests in a climate chamber during development.

### Optical Bench

Optimal visual clarity is essential for any sports use. The excellent optical qualities of uvex eyewear are verified following thorough testing, accurate to one hundredth of a diopter, using an optical bench.

### Firing Test

uvex ensures maximum protection for your eyes, conducting extensive tests on the mechanical strength of the lenses. uvex eyewear is designed to withstand a 6 mm steel ball being fired at the lens at an impact velocity of almost 160 km/h.

# Eyewear Equipment

(sgl 104 vario pictured)

## DIRECT LENS VENTILATION

- Continuous draft-free ventilation
- Guarantees clear vision with anti-fogging protection
- uvex climate control

## DIRECT FRAME VENTILATION

- Continuous draft-free ventilation
- Guarantees clear vision with anti-fogging protection
- uvex climate control

## INTERCHANGEABLE LENS TECHNOLOGY

- innovative interchangeable

## ADAPTABLE NOSE PADS/ ADAPTABLE EARPIECE ENDS

- flexible, soft earpiece ends for non-slip fit
- flexible nosepads
- pressure-free hold and perfect fit

## SOFT NOSE PADS/ SOFT EARPIECE ENDS

- optimal wearing comfort
- extremely soft, smooth and dimensionally stable
- pressure-free non-slip fit for sports eyewear

# Lens Technology

## → DECENTRED LENS TECHNOLOGY

Guaranteed distortion-free vision even in highly curved lenses. All lenses meet Class 1 optical quality.

## → DÉGRADÉ

The color gradient in the lens – tinted at the top and increasingly clear towards the bottom – ensures reliable glare protection from above while maintaining clear vision towards the bottom.

## → VARIOMATIC

Whether sweat, water splashes or dirt: uvex sports eyewear can be easily and quickly cleaned. This guarantees clear visibility at all times, even in extreme conditions.

## → LITEMIRROR

Sophisticated mirror technology combining fashion and function. The lens coating, up to 18 layers thick, does not just look trendy, it also offers extra protection against infrared light. Harmful IR rays are effectively reflected and kept away from the eye.

## → EASY TO CLEAN

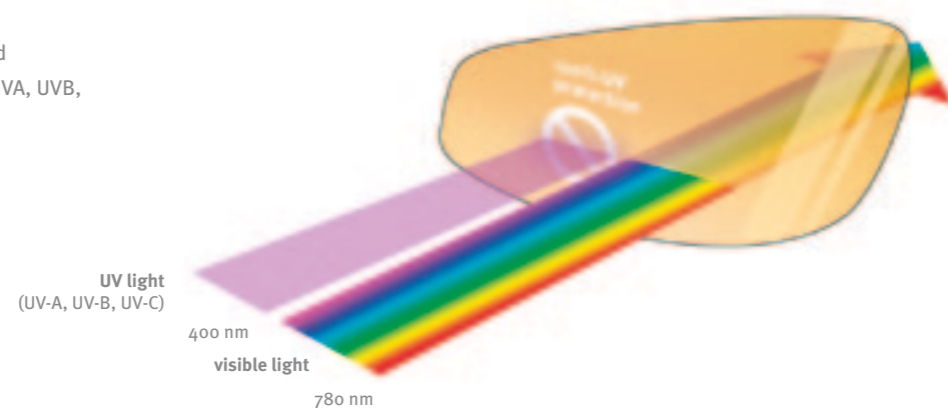

Whether sweat, water splashes or dirt: uvex sports eyewear can be easily and quickly cleaned. This guarantees clear visibility at all times, even in extreme conditions.

## → uvex SUPRAVISION®

extremely scratchproof lens on the outside and a constantly fog-free lens with 100% UV protection.

## → UV-PROTECTION

uvex – ultraviolet excluded  
All lenses provide 100% UVA, UVB, and UVC protection

# Lens Colors

**CLEAR**  
 • Protection from wind, insects and debris  
 • Good vision at night and in the dark  
 • T: 80-100 % // P: S 0

**LITEMIRROR YELLOW**  
 • Extremely contrast enhancing, especially in low light conditions (fog and cloud)  
 • T: 43-80 % // P: S 1

**LITEMIRROR BROWN**  
 • All-day sun protection  
 • Good contrast and natural colors  
 • Protection from infrared rays  
 • T: 8-18 % // P: S 3

**LITEMIRROR RADAR DÉGRADÉ**  
 • Protection from glare from above – clear vision below  
 • Trendy lens color – enhances contrast  
 • Protection from infrared rays  
 • T: 43-80 % // P: S 1

**MIRROR GREEN**  
 • Protection from intense sunlight  
 • Perfect infrared protection  
 • T: 8-18 % // P: S 3

**LITEMIRROR SILVER**  
 • Protection from intense sunlight  
 • Perfect infrared protection  
 • T: 8-18 % // P: S 3

**LITEMIRROR ORANGE**  
 • Extremely contrast enhancing  
 • Protection from infrared rays in glaring sunlight  
 • T: 43-80 % // P: S 1

**MIRROR SILVER**  
 • Protection from intense sunlight  
 • Not suitable for operating motor vehicles  
 • T: 3-8 % // P: S 4

**VARIOMATIC BROWN**  
 • All-day sun protection  
 • Color-neutral vision  
 • Perfect infrared protection  
 • T: 65-9 % // P: S 1-3

**LITEMIRROR SMOKE DÉGRADÉ**  
 • Protection from glare from above – clear vision below  
 • Good contrast and natural colors  
 • Protection from infrared rays  
 • T: 18-43 % // P: S 2

**MIRROR RED**  
 • Protection from intense sunlight  
 • Perfect infrared protection  
 • T: 8-18 % // P: S 3

**SMOKE**  
 • All-day sun protection  
 • Good contrast and natural colors  
 • T: 8-18 % // P: S 3

**VARIOMATIC SMOKE**  
 • All-day sun protection  
 • Color-neutral vision  
 • Perfect infrared protection  
 • T: 78-9 % // P: S 1-3

**LITEMIRROR CLEAR**  
 • Protection from wind, insects and debris  
 • Good vision at night and in the dark  
 • Protection from infrared rays  
 • T: 43-80 % // P: S 1

**MIRROR BLUE**  
 • Protection from intense sunlight  
 • Perfect infrared protection  
 • T: 8-18 % // P: S 3
