CYCLE PRODUCTS

Life's simple pleasures

The simplicity age

We all remember it. It was not too long ago when the most successful people were identified by sharp suits, fast cars and a high lifestyle. Not that it was wrong. It was just another time. Society has moved on.

Today we know that the luckiest person is not the one behind the huge desk with a cigar. It's the free, healthy man. Him who makes a living by doing what he wants. Some of the wealthiest businessmen now wear jeans and a t-shirt. Some of their most valuable collaborators work from home. Some even ride a bicycle to the office. Frugality is the new power. Simplicity is the new statement.

All this time, the bicycle stood there, waiting to regain the status of the cleverest vehicle of all. Petrol is the past. Electricity may be the future. But for the time being, the bicycle remains the top transportation. And that's not only because it's clean and cheap. It's because it highlights the value of the simple things in life. That's exactly what we wish to celebrate in 2014, starting from the next pages. Ride along.

De Grote Pijperlaan

DE GROSSE PIPERLAAN

VOORZICHTIG!

Een fiets is geen speelgoed. Het is een vervoermiddel met een groot draagvermogen. Het is belangrijk om veilig te rijden. Het is belangrijk om de verkeersregels te volgen. Het is belangrijk om de verkeersregels te volgen.

▼ POLISPORT GROUP

The complete cycle

At Polisport we are deeply committed with the task of delivering high quality cycling products. That's why we are progressively increasing our role in the process.

Thanks to our Design Center, our products are born in-house, at Polisport headquarters. From there they go into prototyping and testing in our laboratory. The next step is the mold construction, which happens at Polisport Molds, the most recent company of Polisport group. The following stage is injection, which happens at Polinter, our injection plant.

Then we do the assembling and shipping using the renewed assembly lines and loading docks.

Keeping the complete product cycle in-house means a better control of quality and cost. In the end, it means delivering a product we can fully trust. That's our mission and also a great pleasure.

▼ POLISPORT QUALITY CONTROL

The highest standards are here.

Quality control, performance analysis and safety tests are the most critical part of product development. The legal requirements and the standards of the industry are high.

To be a step ahead we've built our own modern laboratory with all the technology required to make sure our products meet the mandatory standards of the certifying labels. More than that, having our own laboratory means we can keep developing and testing innovative solutions for our products.

▾ HARNESS BUCKLES

There's no such thing as too much safety. That is why Polisport designed its own harness buckles. These buckles were engineered and tested to endure tensions well over those generated by the weight of the baby. The design of the buckle requires three buttons to be pushed simultaneously to unbuckle. This makes it impossible for a child to release the harness without help.

▾ FRAME MOUNTING HOLDER

It doesn't matter how well designed a baby-seat is. If it is not properly attached to the bike it is not safe. Polisport as devoted all the time, knowledge and effort needed to develop the safest holder. Thoroughly engineered, this holder provides an extremely stable and tight mounting and yet is small enough not to bother the rider when the baby-seat is not in use. The cable guides and rubber padding, also protect the bike.

▾ EASY SLIDE SYSTEM

The easy and comfort of use is as important for a child as it is for a parent. That is why Polisport has developed the Easy Slide System. On baby-seats equipped with this solution, it is possible to move the seat backward and forward without using any tools. Its simplicity makes it easier to adjust and easier to seat the child.

▾ QUICK SAFETY TURN

We like to make things simple. That's why we don't like to depend on tools to make small adjustments to the baby-seat. QST is a specially designed screw with a safety button that allows immediate adjustments to the positioning and assemble of the seat while offering a totally safe and tight mounting. With QST you don't need to use any tools.

▾ RECLINABLE SYSTEM

Children are not all the same. Some are taller, some are quieter and some enjoy long rides. This reclining system allows a movement of up to 20° to help each child to find his/her favorite position.

REGISTERED DESIGN

For each new baby-seat developed, many hours were spent perfecting its shape. That is why all our models have registered design. But beyond seat shapes, there are functional solutions that were meticulously designed to take safety, comfort and functionality to the highest standards.

GUPPY JUNIOR

NEW

DESIGN SAFETY AND COMFORT

POLISPORT BABY-SEAT MOUNTING SYSTEM

FRAME MOUNTING SYSTEM

Polisport's Frame Mounting System was developed to be safe, simple, reliable, efficient and easy to use. The double rabbit and click system has a very smooth action when mounting the baby-seat, sliding easily into the slots and requiring no more pressure than the weight of the seat. At Polisport we love bicycles so we developed the mounting system in order to avoid any scratch on the frame.

Inside the holder a rubber pad protects the bicycle and allows the mounting system to adapt to frames of all different (Ø 28-40) and sizes. The rear part of the frame mounting system has an opening to allow the cables to fit in without getting pinched. It takes only a light push of the button to release the baby-seat.

Ø 28 - 40

CARRIER MOUNTING SYSTEM

Polisport's Carrier Mounting System was developed to take advantage of bikes equipped with luggage carriers. Mounting the baby-seat to the luggage carrier is very simple and effective. The bottom of the seat is tightly attached to the carrier.

This solution increases stability which is important for the rider. This system, which uses QST technology, doesn't require any tools to mount or remove the seat so it's easy to transfer it from one bicycle to another. The Carrier Mounting System can also be moved backward and forward to adjust to any bike and child size.

Carriers not wider than 175mm

^ RACK MOUNTING SYSTEM (RMS)

NEW

Multiple points for fitting the RMS base to the carrier

^ The baby-seats with carrier mounting systems are still the most practical as they allow for a fast, simple and safe installation. Now we've made it even simpler with the RMS. In this new solution, the mounting system is supplied with the baby-seat, requiring fewer steps to complete the installation.

^ Once the base is firmly attached to the carrier, the seat is fixed or removed with just a manual twist from a screw. No tools are required and the system meets all the safety standards (EN 14344).

^ When riding without the seat on, the base doubles as a practical object carrier with the help from its straps.

Life's simple pleasures

Being with the family

Out of all the good things in life, nothing is more biological and simple than the pleasure of being with the family. However, progress made it something you need to strive for. By using a bike to transport your children to the school or simply to ride for fun, you're spending more quality time with them.

For you to enjoy great moments in family, we put a lot of time and effort in the development of our baby-seats. Because, after all, you entrust us the best part of your life.

Life's simple pleasures

Learning

So much is what we need to learn in life, that we tend to undervalue the joy of learning. But think about the feeling of discovering something new and suddenly being into it. Getting more and more immersed on the process of learning a new skill is one of life's greatest pleasures.

Whatever the age in which you decide to get into bicycles you will feel the urge of learning everything about it. So the sooner, the better. Grab a Polisport helmet and safely get your child get into the world of cycling. From the comfort of the baby-seat to the first exploratory rides, we have it all covered with our range of junior helmets.

Life's simple pleasures

Adventure

We deny ourselves many of the greatest pleasures in the name of conscience, maturity, image or safety. A rational life mustn't be a boring one. Allow yourself the pleasure of adventure. Do things another way. Travel by other means. Choose unknown paths. Challenge yourself and take calculated risks.

The bicycle is a safe and slow transportation. The perfect vehicle for adventure, made better by our range of helmets. Feel comfortable, be safe and look good whatever your route is.

Life's simple pleasures

Freedom

Freedom is not about going where you want. It's about enjoying the way there and back. Riding a bicycle means having time to enjoy the moment and really noticing the details along the way. Besides, nothing is parting you from the places you pass by: feel the smells, enjoy the breeze, ear the birds.

And for those little annoying things you don't want to feel or touch, we have designed solutions. Our range of mudguards covers every scenery, fits any bike and even matches your style.

▼ **O.E CHAIN CASE**
Front and rear fitting – Two pieces chain case

mounting
city bikes

weight
551 gr / 1,21 lb

other features
Fully made of resistant yet lightweight polypropylene, the two combined parts are simply snapped together with the small clips installed all around. This system also eliminates the glide noises.

Our chain case allows an easy maintenance and access to the chain since you can un-clip the front part without using any tools.

Accommodates larger chain rings (up to 44 teeth).

The Chain Case is secured to the bike frame using two special metal parts, which are available in different sizes and shapes so that you can easily adapt the chain case position in relation to the line of the chain.

Customizable for OEM clients: Now, with the use of IPD, Inmold Plastic decals, it can also be stylish, with a durable and scratch resistant decoration. As an OEM part, it can be customizable with any kind of graphic, allowing vivid colors an empowering your brand image. Material: polypropylene. 100% recyclable material. Mounting Kit Included.

POLISPORT TARGETS OEM WITH CUSTOMIZABLE MUDGUARD AND CHAIN CASE.

PLASTIC PARTS WITH INFINITE DECORATION POSSIBILITIES.

This product was designed with customization in mind. By applying bespoke graphics, it can be ordered by bicycle manufacturers to be used as OEM, or by retail brands to become an exclusive product.

OUR DESIGN, YOUR STYLE.

NEW

IPD in mold plastic decals

IPD INMOLD PLASTIC DECALS

Is the name of the exclusive technology Polisport is bringing to bicycle plastic parts. This technology has been used for years by this company which also makes plastic parts for off-road motorbikes. Tested with success in tough racing conditions, this is a decoration process which fuses graphics onto plastic parts as a stronger alternative to decals. As a result, graphics don't fade, peel, crack, come off the plastic or lose color. This technology is an added value for bicycle manufacturers as it opens possibilities for customization. Besides the usage of this patented and exclusive technology, the plastic parts are available in any imaginable color and thus allowing you to make beautiful color combinations.

IPD technology can now be seen on a new mudguard and chain case made with OEM in mind.

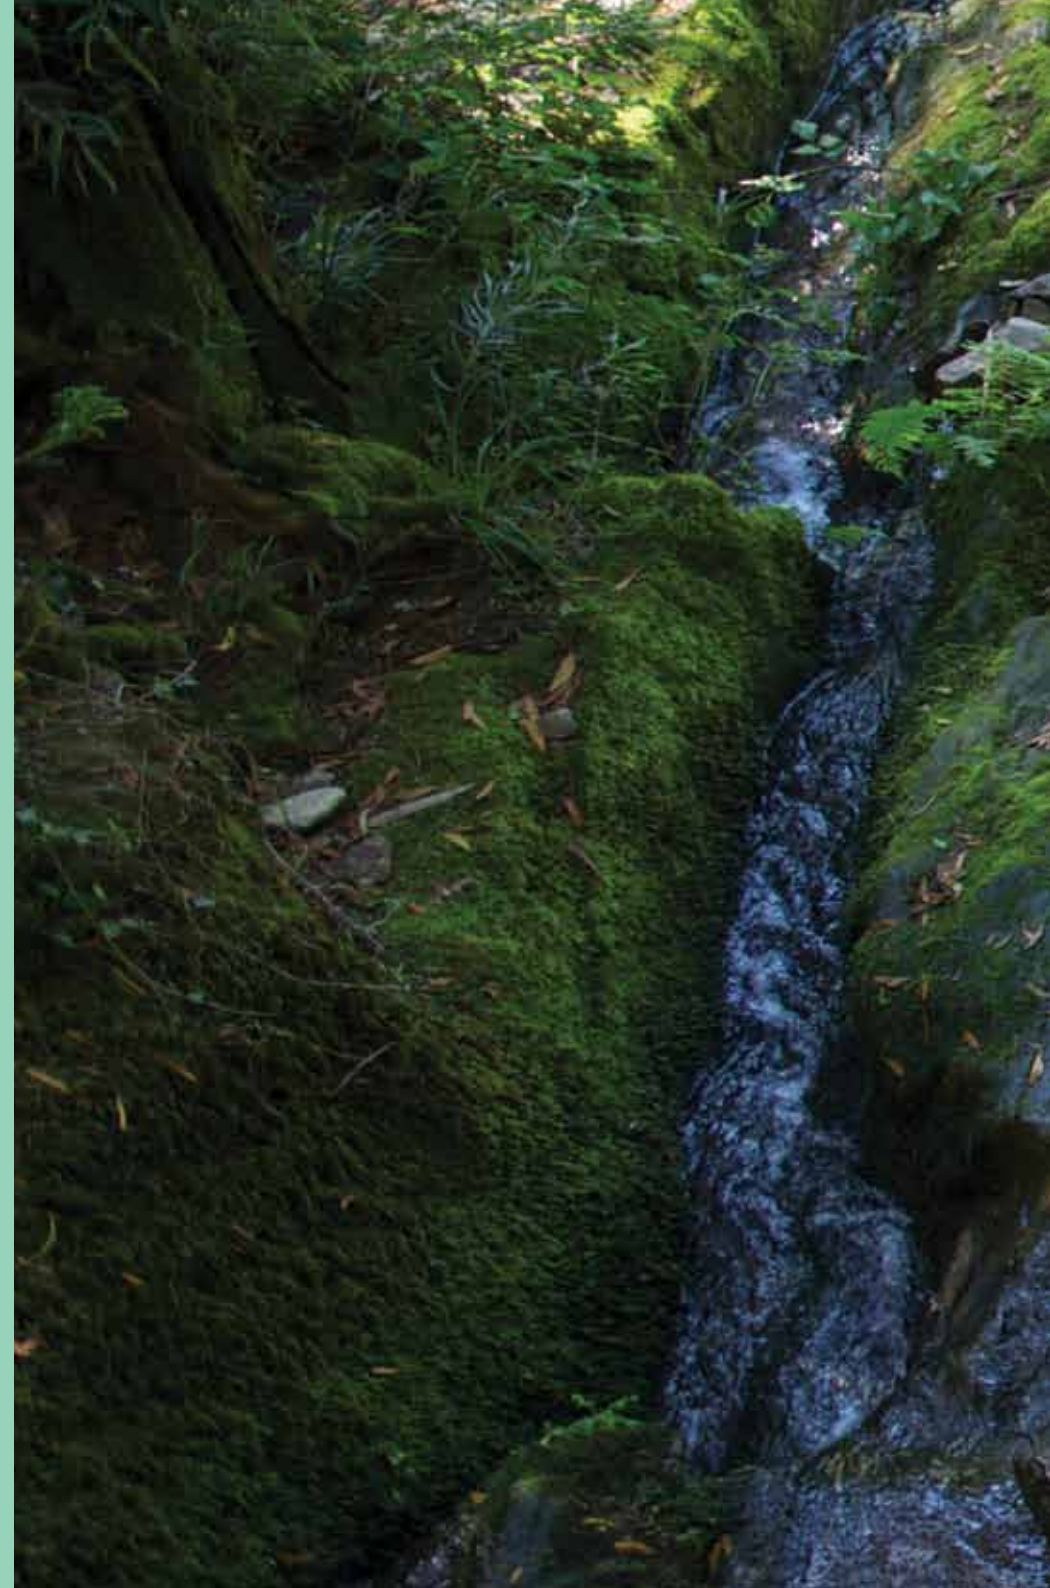

Life's simple pleasures

Feeling healthy

Not even all the money in the world can buy the feeling of a healthy body. Now, more than ever, we know how to be healthier for longer. The bicycle is with you for that goal. Pedal on your daily commute and you're ruling out some the biggest threats to your life. Soreness is better than stillness. Sweat is better than fat. Thirst is easier to kill than laziness.

Our range of water bottles makes your ride more bearable. Our technologies make both you and our planet healthier.

ENVIRONMENT FRIENDLY TECHNOLOGIES

Nature assimilates a bottle in less than 6 months REALLY GREEN TECHNOLOGY THAT WORKS

100% BIO-NATURAL

We want to make cycling an increasingly greener activity. So it's with pride that we present you with our special biodegradable bottles made from natural raw material. Being biodegradable means that nature can assimilate a disposed of bottle in less than six months without harming the environment or atmosphere. At the same time, by using natural raw material we also reduce the use of fossil fuel.

- Material derived from renewable sources.
- Fully biodegradable plastic that behaves like traditional thermoplastics.
- Bioplastic as defined by the European Bioplastics Association.
- Biodegradable Plastic as defined by the EN 13432:2000 and EN 14995:2006 standards.
- Reduction in the emission gases that cause the "green-house" effect.

Anti microbial thermoplastic RIDING HARD, DRINKING SAFELY

ANTI MICROBIAL

Intense use of the bicycle calls for better accessories. To avoid the well-known microbial problems associated with plastic water containers like odours and bad-tasting water, Polisport introduces the Anti Microbial bottle. By using anti microbial thermoplastic this bottle provides protection against harmful bacteria. It not only prevents the formation of new microbes; it also eliminates any existing ones in 24 hours. Keeping all harmful infections at distance, this is the most durable bottle on offer.

- PROTECTION = HYGIENE = HEALTHIER SPORTS
- This bottle releases ions which act against harmful bacteria (proven to kill >99.9%) complies with JIS Z 2801 and ISO 22196:2007.
- No unpleasant odours or flavours that microbial organisms can create.
- EFSA and FDA approved as suitable for food contact.
- Complies with EN 71-1,2,3 and Directive 2002-72-EC.

Mixture of plastic and cork LESS PLASTIC FOR A BETTER ENVIRONMENT

CORK BOTTLES

The functional simplicity of the water bottle does not mean we cannot strive to improve it. Polisport is pioneering a green technological solution by using a mixture of plastic and cork in the production of water bottles. This translates into reduced use of plastic in favour of a natural raw material with better thermal performance. Cultivated and extracted using sustainable methods, the cork also adds lightness to the bottle while offering a pleasant touch and better grip.

- Ecological and sustainable material.
- Reduction in CO2 emissions and fossil fuel usage.
- Complies with EN 71-1,2,3 and Directive 2002-72-EC
- Soft to the touch with a natural and hypoallergenic surface.
- EFSA and FDA approval as suitable for food contact.
- Complies with EN 71-1,2,3 and Directive 2002-72-EC.

IF Design Award is a reputed competition held by the International Forum Design Hannover. The iF label is recognized all over the world as a warranty of design excellence. Corky water bottle was awarded this honor from the jury for the creation of a new material and use consisting of cork and plastic for its outer shell. Beyond just being innovative and functional, this technology allows a large reduction in the use of plastic and offers a better thermal performance of the bottle.

THERMAL WATER BOTTLE

keeps the water cold or hot.

SMASH

4 HOURS THERMAL

model
Smash

hydration capacity
500 ml/16,91 fl. oz

standards
EN 71 - 1, 2, 3
Directive 2002 - 72 - EC

weight
166 gr / 0,37 lb

material
Bottle - LDPE - low density polyethylene.
Inner Tank: Hi-Density Polyethylene
CAP: Copolyester resin - BPA free
TIP: POP - Polyolefin Plastomer

opening
Screw-On Opening
(wide opening Ø 65 mm)

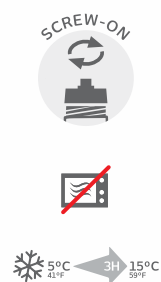

8641900009 - black/white
8641900010 - flashy blue/white
8641900011 - white/black

master box dimensions 50 UN 490 x 440 x 570

other features

Thermal efficiency and ergonomic design. Isothermal double wall structure: Double-wall construction keeps water cold twice as long as regular sport bottles. Cap with soft push-pull tip and protective cap. CAP: Copolyester resin - taste your beverage and not your bottle. Cap can be completely removed for better cleaning and fill up. Wide-mouth opening is easy to fill with ice and water and a breeze to clean. Bottle body with easy-squeeze polyethylene. Regular Hi-Flow of liquid. Lightweight, easy-squeeze bottle delivers the right flow to quench your thirst. Ergonomic grip. We don't recommend heating the bottle in a microwave since contents can heat unevenly. We only recommend putting warm liquids in the Smash Bottles. Complies with food contact regulation.
