

**Polisport®**

2015  
CYCLE PRODUCTS

The bicycle highlights the value  
of the simple things in life.  
Ride along.

# POLISPORT GROUP

The complete cycle

At Polisport we are deeply committed with the task of delivering high quality cycling products. That's why we are progressively increasing our role in the process.

Keeping the complete product cycle in-house means a better control of quality and cost. In the end, it means delivering a product we can fully trust. That's our mission and also a great pleasure.

→ **Design Center**  
Thanks to our Design Center, our products are born in house, at Polisport headquarters.

→ **Quality Center Test**  
From the design center our products go through prototyping and testing in our Quality Center Test.

→ **Polisport Molds**  
The next step is the molds construction. The group's own mold construction/developing plant: Polisport Molds.

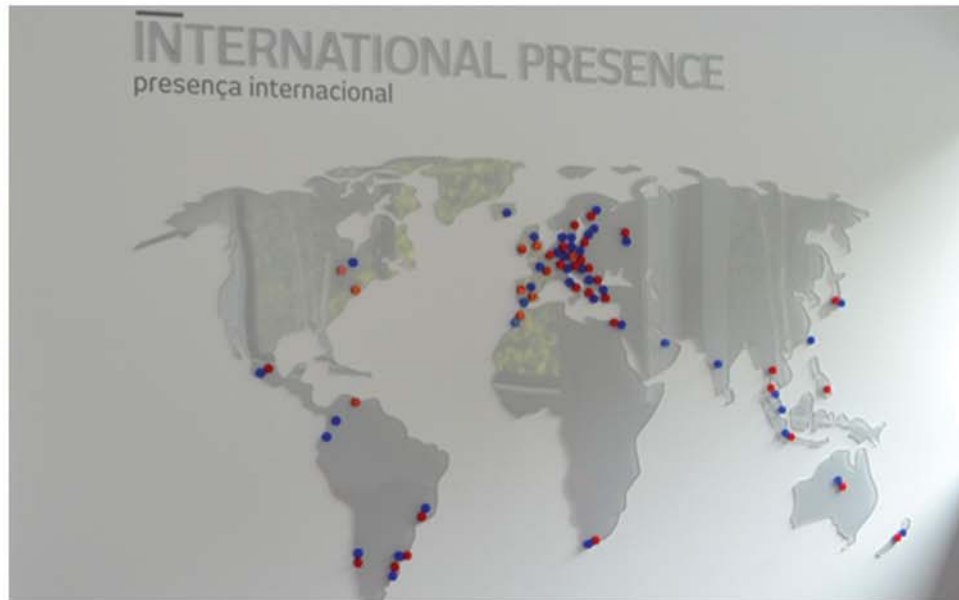

→ **Polinter**  
The following stage is injection, which happens at Polinter, our inject plant.

→ **Assembling**  
We do the assembling using the renewed assembly lines and loading docks.

→ **Shipping & Sales**  
We deliver our product to 60 countries worldwide. We also have a dedicated sales and marketing team.

60 countries worldwide

# POLISPORT QUALITY CONTROL

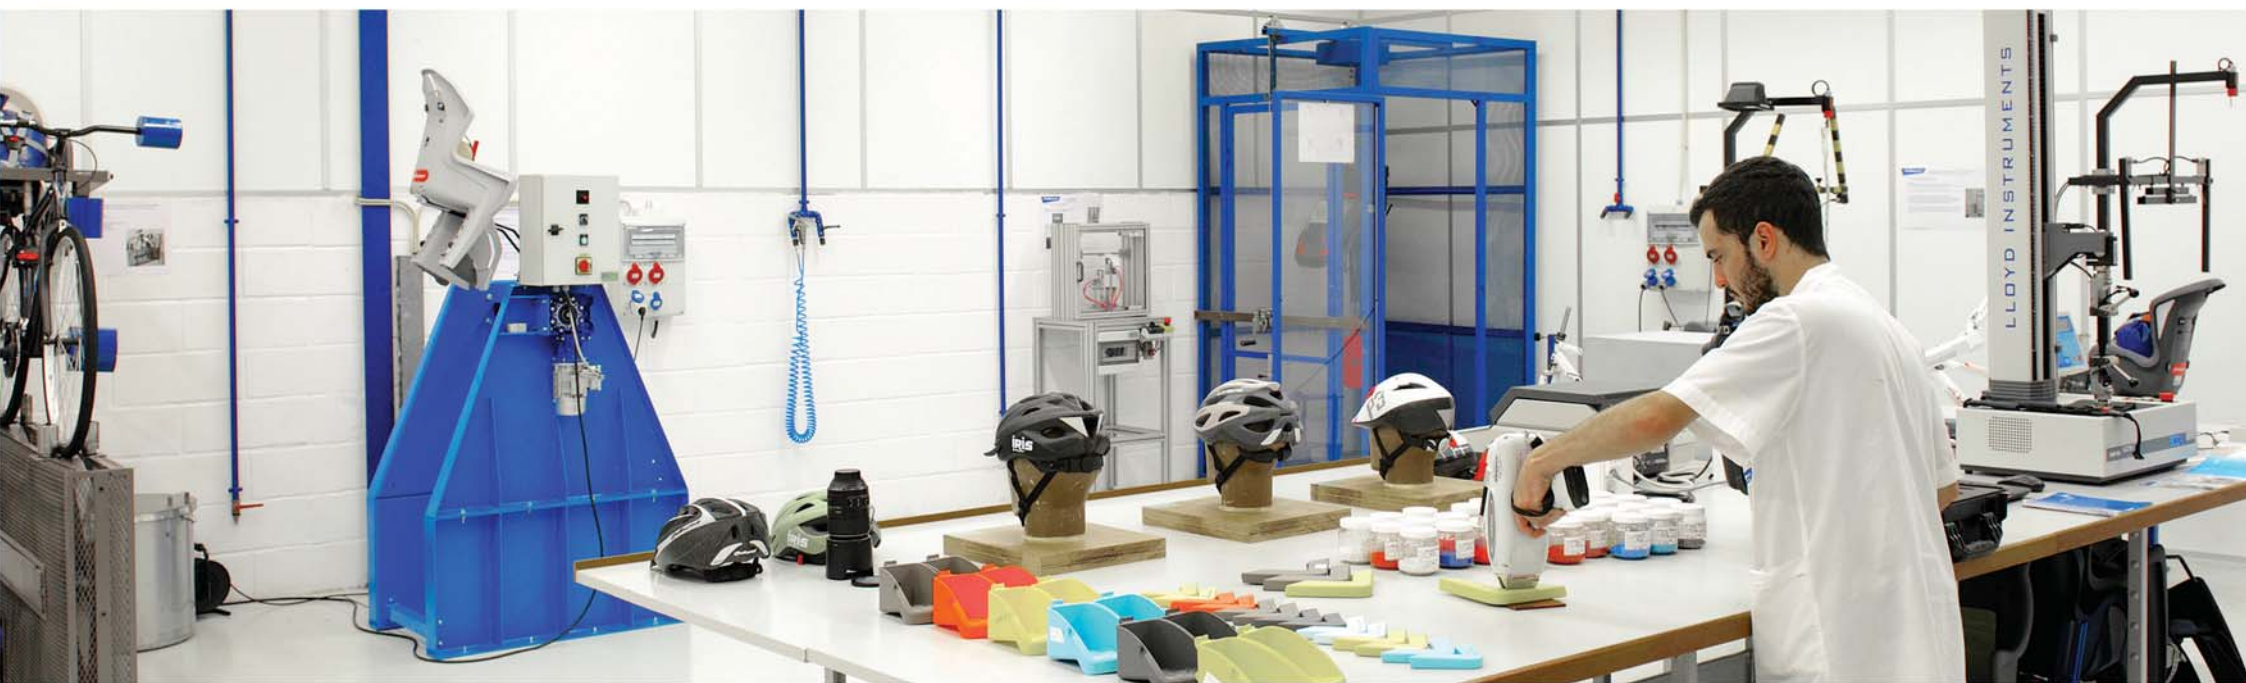

The highest standards are here.

Quality control, performance analysis and safety tests are the most important part of product development. The legal requirements and the standards of the industry are high.

To be a step ahead we've built our own modern quality center with all the technology required to make sure that our products meet the mandatory standards of the certifying labels. More than that, having our own quality center means we can keep developing and testing innovative solutions for our products.

# DESIGN SAFETY AND COMFORT

## ✓ EASY SLIDE SYSTEM (ESS)

Polisport has developed the Easy Slide System. On baby-seats equipped with this solution, it is possible to move the seat backward and forward without using any tools. Its simplicity makes it easier to adjust and move the child while seated.

## ✓ HARNESS BUCKLES

Polisport designed its harness buckles. The design of the buckle requires three buttons to be pushed simultaneously to unbuckle. This makes it impossible for a child to release the harness on its own.

## ✓ QUICK SAFETY TURN (QST)

QST is a special designed screw with a safety button that allows immediate adjustments to the positioning and assemble of the seat while offering a totally safe and tight mounting. With QST you don't need to use any tools.

## ✓ RECLINABLE SYSTEM (RS)

This reclining system allows a movement of up to 20° to help each child to find his/her favorite position.

# BABY-SEAT MOUNTING SYSTEM

## FRAME MOUNTING SYSTEM (FF)

Polisport's Frame Mounting System was developed to be safe, simple, reliable, efficient and easy to use. The double ratchet and click system has a very smooth action when mounting the baby-seat, sliding easily into the slots and requiring no further pressure than the weight of the seat. At Polisport we love bicycles so we developed the mounting system in order to avoid scratches on the frame. Inside the holder a rubber pad protects the bicycle and allows the mounting system to adapt to frames of all different (Ø 28-40) sizes. The rear part of the frame mounting system has an opening to allow the cables to fit in without getting pinched. It takes only a light push of the button to release the baby-seat.

## CARRIER MOUNTING SYSTEM (CFS)

Polisport's Carrier Mounting System was developed to take advantage of bikes equipped with luggage carriers. Mounting the baby-seat to the luggage carrier is very simple and effective. The bottom of the seat is tightly attached to the carrier. This solution increases stability which is important for the rider. This system, which uses QST technology, doesn't require any tools to mount or remove the seat so it's easy to transfer it from one bicycle to another. The Carrier Mounting System can also be moved backward and forward to adjust to any bike and child size.

## RACK MOUNTING SYSTEM (RMS)

**P**  
PATENT

The baby-seats with carrier mounting systems are still the most practical as they allow a fast, simple and safe installation. Now we've made it even simpler with the RMS. In this solution, the mounting system is supplied with the baby-seat, requiring fewer steps to complete the installation.

Once the base is firmly attached to the carrier, the seat is fixed or removed with just a manual twist from a screw. The system meets all the safety standards (EN 14344).

When riding without the seat on, the base doubles as a practical object carrier with the help from its straps.

# BICYCLE SEATS

Baby-seats, the first link between the future generation and the bicycle. The best way for you to spend more quality time with your children.

## GUPPY<sup>®</sup> JUNIOR

carrier mounting system

### model

GUPPY JUNIOR seat

### mounting

Carrier in accordance with EN 14872  
For carriers not wider than 175mm

### child weight

22 to 35 Kg

### seat weight

3,31 kg / 7,30 lb

### seat dimensions

width 394 x height 563 x depth 435

### safety

Pair of footrests that can be easily mounted on the frame at the correct height according to the children's size.

Security belt: Guppy Junior comes with one security belt and extra safety harness to be strapped to the bicycle frame and a lap belt for the child.

### comfort

Ergonomic shape for back support.  
Soft and washable cushion.

### other features

Quick safety turn (QST) - no tools needed; easy assembling of the baby-seat on the carrier.  
Guppy Junior is supplied fully assembled and can therefore be used straight out of the box.  
The seat can also be moved back and forth to be adjusted to any carrier and child size.

## GEORGIA - SET REAR + FRONT MUDGUARDS

**mounting**  
26" / 28" wheels (set)

**weight**  
293 gr / 0,65 lb

**other features**  
Nose at the front and Spoiler at the rear for an optimal protection. The Mudguard length ensures that you, and also the cyclist behind you, are spared from splashing. This mudguard ensures stable mounting via its U 3 millimeters stainless steel and offers the best protection by covering almost the entire wheel. The "U steel Stays" keep the mudguard rigid. Georgia can easily be mounted on almost any racing bike and perfectly adapted to the radius of the wheel by adjusting the length of the stays. Mounting Kit Included.

#### ▶ MOUNTING KIT (included)

#### O.E CHAIN CASE

Front and rear fitting  
Two pieces chain case

**mounting**  
city bikes

**weight**  
551 gr / 1,21 lb

#### other features

Fully made of resistant yet lightweight polypropylene, the two combined parts are simply snapped together with the small clips installed all around. This system also eliminates the glide noises.

Our chain case allows an easy maintenance and access to the chain since you can un-clip the front part without using any tools.

Accommodates larger chain rings (up to 44 teeth).

The Chain Case is secured to the bike frame using two special metal parts, which are available in different sizes and shapes so that you can easily adapt the chain case position in relation to the line of the chain.

Customizable for OEM clients: Now, with the use of IPD, Inmold Plastic decals, it can also be stylish, with a durable and scratch resistant decoration. As an OEM part, it can be customizable with any kind of graphic, allowing vivid colors an empowering your brand image. Material: polypropylene. 100% recyclable material. Mounting Kit Included.

# TARGETS OEM WITH CUSTOMIZABLE MUDGUARDS AND CHAIN CASE

This product was designed with customization in mind. By applying bespoke graphics, it can be ordered by bicycle manufactures to be used as OEM, or by retail brands to become an exclusive product.

**IPD** in mold plastic decals

## IPD INMOLD PLASTIC DECALS

Is the name of the exclusive technology Polisport is bringing to bicycle plastic parts. This technology has been used for years by this company which also makes plastic parts for off-road motorbikes.

Tested with success in tough racing conditions, this is a decoration process which fuses graphics onto plastic parts as a stronger alternative to decals. As a result, graphics don't fade, peel crack, come off the plastic or lose color.

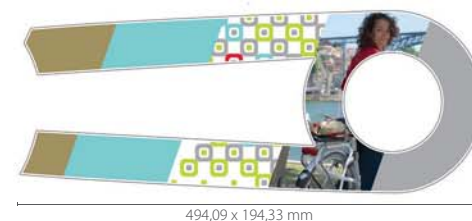

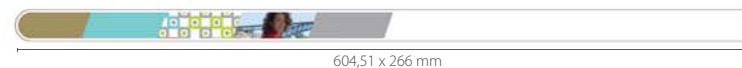

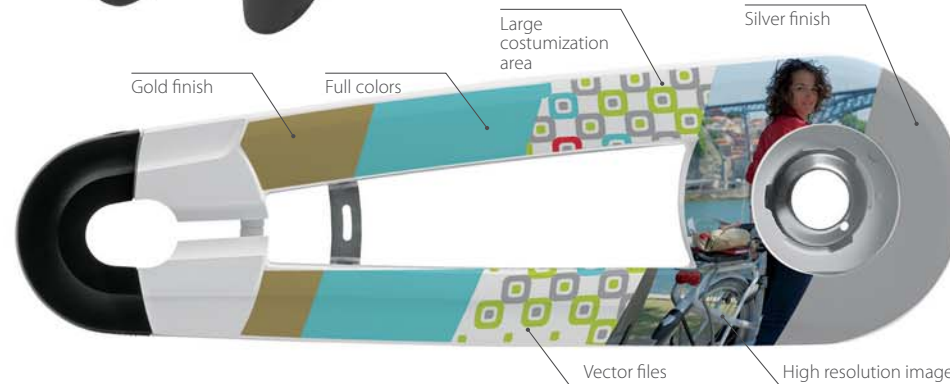

This technology is an added value for bicycle manufacturers as it opens possibilities for customization.

Besides the use of this patented and exclusive technology, the plastic parts are available in any imaginable color and thus allowing you to make beautiful color combinations.

Infinite decorations possibilities

IPD technology can now be seen on a new mudguard and chain case made with OEM in mind.

**customizable areas dimensions:**  
 front mudguards - 604,51 x 266 mm  
 rear mudguards - 914,51 x 266 mm  
 chain case - 494,09 x 194,33 mm

# AMAZING GRAPHICS GREAT PROMOTIONAL POTENCIAL

## SLEEVE

PHOTOGRAPHIC RESOLUTION  
FULL 360° DECORATION  
VIBRANT COLORS

### 3 STEPS TO MAKE YOUR SLEEVE BOTTLE

1. CHOOSE AN IMAGE TO DECORATE YOUR BOTTLE (1,70 X 257,5MM)

2. E-MAIL US THE PICTURE OR PDF FILE TO: POLISPORT@POLISPORT.COM

3. PRETTY SOON YOUR BOTTLE WILL BE READY TO USE

### SLEEVE BOTTLES

To enhance the potencial customization of water bottles, Polisport presents a brand new product. Sleeve technology allows full 360° decoration with vibrant colors and photographic definition. The quality and flexibility of the bottle is not affected by the graphics and its customization is low-priced. Sleeve technology from Polisport can boost the promotional use of water bottles by cycling teams or companies.

- Full bottle decoration.
- Photographic resolution and vibrant colors.
- EFSA and FDA approval as suitable for food contact.
- Complies with EN 71-1,2,3 and Regulation 10/2011.

# ENVIRONMENT FRIENDLY TECHNOLOGIES

Innovation & functionality

IF Design Award is a reputed competition held by the International Forum Design Hannover. The iF label is recognized all over the world as a warranty of design excellence. Corky water bottle was awarded this honor from the jury for the creation of a new material and use consisting of cork and plastic for its outer shell. Beyond just being innovative and functional, this technology allows a large reduction in the use of plastic and offers a better thermal performance of the bottle.

Nature assimilates a bottle in less than 6 months  
**REALLY GREEN TECHNOLOGY THAT WORKS**

100% BIO-NATURAL

We want to make cycling an increasingly greener activity. So it's with pride that we present you with our special biodegradable bottles made from natural raw material. Being biodegradable means that nature can assimilate a disposed of bottle in less than six months without harming the environment or atmosphere. At the same time, by using natural raw material we also reduce the use of fossil fuel.

- Material derived from renewable sources.
- Fully biodegradable plastic that behaves like traditional thermoplastics.
- Bioplastic as defined by the European Bioplastics Association.
- Biodegradable Plastic as defined by the EN 13432:2000 and EN 14995:2006 standards.
- Reduction in the emission gases that cause the "green-house" effect.

ref. - 550 ml  
**8644400008** - light green

88 UN master box box dimensions 88 UN 768 x 388 x 432

Anti microbial thermoplastic  
**RIDING HARD, DRINKING SAFELY**

ANTI MICROBIAL

Intense use of the bicycle calls for better accessories. To avoid the well-known microbial problems associated with plastic water containers like odours and bad-tasting water, Polisport introduces the Anti Microbial bottle. By using anti microbial thermoplastic, this bottle provides protection against harmful bacterias. It not only prevents the formation of new microbes but it also eliminates any existing ones in 24 hours. Keeping all harmful infections at distance, this is the most durable bottle on offer.

- PROTECTION = HYGIENE = HEALTHIER SPORTS
- This bottle releases ions which act against harmful bacteria (proven to kill >99.9%) complies with JIS Z 2801 and ISO 22196:2007.
- No unpleasant odours or flavours that microbial organisms can create.
- EFSA and FDA approved as suitable for food contact.
- Complies with EN 71-1,2,3 and Regulation 10/2011.

ref. - 550 ml  
**8644400007** - light blue

88 UN master box box dimensions 88 UN 768 x 388 x 432

Mixture of plastic and cork  
**LESS PLASTIC FOR A BETTER ENVIRONMENT**

CORK BOTTLES

The functional simplicity of the water bottle does not mean we cannot strive to improve it. Polisport is pioneering a green technological solution by using a mixture of plastic and cork in the production of water bottles. This means into reduced use of plastic in favour of a natural raw material with better thermal performance. Cultivated and extracted using sustainable methods, the cork also adds lightness to the bottle while offering a pleasant touch and better grip.

- Ecological and sustainable material.
- Reduction in CO2 emissions and fossil fuel usage.
- Soft to the touch with a natural and hypoallergenic surface.
- EFSA and FDA approval as suitable for food contact.
- Complies with EN 71-1,2,3 and Regulation 10/2011.

 master box dimensions 50 UN 490 x 440 x 570

**other features**

Thermal efficiency and ergonomic design. Isothermal double wall structure: Double-wall construction keeps water cold twice as long as regular sport bottles. Cap with soft push-pull tip and protective cap. CAP: Copolyester resin – taste your beverage and not your bottle. Cap can be completely removed for better cleaning and fill up. Wide-mouth opening is easy to fill with ice and water and a breeze to clean. Bottle body with easy-squeeze polyethylene. Regular Hi-Flow of liquid. Lightweight, easy-squeeze bottle delivers the right flow to quench your thirst. Ergonomic grip. We don't recommend heating the bottle in a microwave since contents can heat unevenly. We don't recommend putting boiling liquids in the Smash Bottles. Complies with food contact regulation.

## COMMUNICATE BETTER

Our continued commitment to deliver innovative products, performance and safety oriented solutions is, as always, our flagship. We want to spread this message and for that we've decided to change to a newly refined identity and aesthetics of the Polisport brand. For 2015 we are taking the next step: changing the whole packaging and product presentation. The goals are quite simple: to help you spot Polisport products easier, to easily tell apart different products in the same range and reduce shipping costs. Retailers win and you win too.

## NEW LOGO

We've changed our logo for a more innovative shape. You shall use this new logo in all of your communications. You can download it from our website (just read the QR Code) or ask for it to your account representative.

# BRAND COMMUNICATION

Rebranding | Packaging | New Communication Tools

## NEW PRODUCT PACKAGING

We've changed all our products packaging with one main goal in mind: to spot Polisport products easier on the shop, but also to provide a better product presentation. We have renewed all the information present on the packaging and added information about all the parts that must be included on the box for a better product offer.
