

# SELLE ROYAL AM 2016 PRODUCT CATALOGUE

**SELLE ROYAL**  
**AM 2016**  
**PRODUCT CATALOGUE**

To evolve you have  
to innovate. To move  
forward you have to  
look back.

Technology powered.

Design inspired.

One thing has remained  
unchanged our  
Comfort experience.

This is the Selle Royal  
commitment to  
supporting cyclists the  
world over.

## **SELLE ROYAL** **SCIENTIA FOR CYCLISTS**

---

The scientific range of saddles, developed in collaboration with the University of Cologne.

Page 4

## **SELLE ROYAL** **PERFORMA FOR CYCLISTS**

---

A range of high-performance saddles dedicated to sport cyclists.

Page 12

## **SELLE ROYAL** **COMFORT FOR CYCLISTS**

---

A range with lines developed for every type of Riding Position from Athletic to Relaxed.

Page 16

# SELLE ROYAL SCIENTIA FOR CYCLISTS

Scientifically developed in collaboration with

Deutsche  
Sporthochschule Köln  
German Sport University Cologne

# FEATURES

## BODY CONTOUR

A radius-specific design to provide optimum comfort for differing spine angles. The more inclined the Riding Position, the smaller the edge-radius.

## REAR PLATEAU

An elevated rear section to prevent backward sliding and decrease pressure in the saddle middle which can cause discomfort.

## CENTRAL RESERVOIR

Indentation in the saddle middle whose shape and dimensions have been studied to correspond to ischial variations for greater comfort.

## 3D SKIN GEL

Royalgel™ is placed intelligently at critical points of contact on the saddle surface for added shock absorption, while reducing overall saddle weight.

## CURVA SUSPENSION

The unique curved suspension design is attached at the rear of the base to offer exclusive comfort by avoiding pressure on the seat bone contact points and guaranteeing additional lateral flexibility.

# MEASUREMENT STEPS

## 1 FIND YOUR RIDING POSITION

## 2 DETERMINE YOUR ISCHIAL VARIATION

Reset the gel pad.

Sit at 90° and apply pressure.

Find the centres of the two ischial impressions and add together the two numbers. The result is your ischial distance.

example:  
5cm+7cm=12cm

# SELLE ROYAL PERFORMA FOR CYCLISTS

Selle Royal Performa is a range of saddles specifically designed to promote maximum movement and flexibility for sport cyclists. Through our exclusive FLAT, WAVE, and ANATOMIC design concepts, we are able to offer the topmost performance for Road, MTB, and Trekking use, keeping riders comfortable and in control of every situation.

## DESIGN CONCEPTS

---

### FLAT DESIGN

Performance cyclists demand great freedom of movement. The horizontal surface of the FLAT saddles guarantees a great flexibility in every riding situation, easing repositioning between the front and rear of the saddle for the maximum control.

### WAVE DESIGN

All-terrain cyclists search for greater comfort in challenging, ever-changing environments. The WAVE saddles feature a contoured surface with greater padding toward the rear for extra grip and control.

### ANATOMIC DESIGN

Endurance riders want to stay comfortable during extended periods of high frequency pedalling. The open design of the ANATOMIC saddles guarantees maximum pressure relief for increased rider perseverance and avoidance of pain in the perineal area experienced by some cyclists.

# PERFORMA FEATURES

Selle Royal has over 50 years experience researching and developing innovative materials, designs and advanced technology to produce the most comfortable high performance saddles on the market. Check out on the technical table for each specific saddle to see if a particular feature is available.

## RAIL

---

### SECTO LIGHT RAIL.

#### SECTO RAIL

Our toughest and lightest hollow tubular rail for extra performance.

### Mn<sup>25</sup>

#### MANGANESE RAIL

A tough and lightweight hollow manganese rail that offers significant weight reduction over standard steel saddle rails.

## COMPONENT

---

#### HIGH P. FOAM

A flexible foam designed for durable elastic recovery with high load bearing properties for outstanding comfort.

#### FLEX FOAM

A flexible foam with a uniform cell structure for enhanced durability and comfort performance.

#### SHOCK SHELL

A flexible and shock absorbent base is proven to provide effective support in sport situations.

#### SCUFF GUARDS

Flash mounted side protectors for added abrasion protection and increased performance in harsh conditions.

# SELLE ROYAL COMFORT FOR CYCLISTS

Selle Royal has categorized 3 riding positions to address some important contact areas: Athletic, Moderate and Relaxed.

Riding position has naturally the most influence on how the sit bones and other intimate parts of the body contact the saddle. It's these contact points that must be addressed with specific saddle designs.

## RIDING POSITIONS

---

### ATHLETIC 45°

The Athletic rider typically sits on the saddle with a 45-degree spine angle.

This more upright position moves the weight distribution and sit bone area farther back on a saddle.

### MODERATE 60°

The Moderate rider typically sits on the saddle with a 60-degree spine angle.

This position continues to move the rider's weight and sit bones farther back on a wider saddle.

### RELAXED 90°

The Relaxed rider typically sits upright with a 90-degree spine angle.

This position places over 60% of the riders weight directly over the rear of the saddle.

## 5 DIFFERENT LINES FOR DIFFERENT CYCLISTS:

### respiro

The top of our line. A central ventilation channel keeps you cool twice as long as ordinary saddles, while the unique ergonomic shape increases comfort by minimizing pressure.

### becoz

Advanced technology is used to replace fossil materials with natural components to reduce environmental impact while maintaining the quality and comfort expected from a Selle Royal saddle.

### LOOKIN

Observe the Royalgel™ experience through windows on the saddle's cover. This line, due to its lighter weight, is dedicated to trekking use.

### Premium

Superior comfort for every taste. Premium saddles are made using our innovative Royal Vacuum Light technology that enables these saddles to be 100% sealed against the elements and 20% lighter. Models available for every bike and riding position.

### Classic

Affordable comfort manufactured to Selle Royal quality standards guarantees a first class saddle. Models available for every bike and riding position.

# COMFORT FEATURES

Selle Royal has over 50 years' experience researching and developing innovative materials, designs and advanced technology to produce the most comfortable high performance saddles on the market.

Check out on the technical table for each specific saddle to see if a particular feature is available.

## ROYALGEL™

Royalgel™ guarantees the highest level of comfort, reducing pressure peaks by up to 40% thanks to its unique tridimensional gel structure.

## HAND MADE

Selle Royal combines more than 50 years of craftsmanship with the best of modern technology.

## WATER RESISTANT

Royal Vacuum Light is a Selle Royal Technology that allows the saddle to be 100% sealed and 20% lighter than ordinary saddles of the same category.

## COOL COVER

Our extraordinary cover is up to 25°C cooler than normal black saddles due to our special material which reflects sunlight.

## STRENGTEX COVER

The cover is made from a unique layer of elastic material to guarantee a saddle of great durability.

## LEATHER COVER

Cover is made from 100% natural leather.

## VENTILATION CHANNEL

Relieves pressure on the perineal area, while reducing uncomfortable perspiration.

## E-BIKE DESIGN

This saddle has been specifically designed to provide maximum comfort to the E-bike user.

## EVERYDAY COMFORT

Owing to its utilitarian design, this saddle is suitable for most any kind of daily activity.

### CORKGEL

An innovative combination of 20% bio-sourced polyurethane gel with natural cork.

### NATURAL OIL

Foam and elastomers are formulated with 15% natural oil polyols based mainly on Castor Oil from sustainable cultivation and Soybean oil from non-food sources.

### CORTEX COVER

The soft-touch, bio-reinforced cover is made with FSC certified conifer wood flour taken from responsibly managed forests according to stringent environmental and social standards.

### 100% BIO BASE

The flexible Bio-base is made from Rilsan® PA11, a lightweight bioplastic produced from 100% plant-based renewable resources.

### SLOW FIT FOAM

With its unique slow recovery property, this memory foam provides superior comfort by molding itself to fit the shape of the body's contact points, creating more uniform pressure distribution while maintaining effective support.

### INTEGRATED CLIP SYSTEM

A patented clip system positioned at the rear of the saddle for easy attachment of a light or saddle bag.

### FOAM MATRIX

The foam matrix open cell structure confers increased elasticity and breathability to guarantee a durable and comfortable saddle.

### ELASTOMERS

Safe, silent and permanently non-deformable, an elastomer can absorb even the severest and most unexpected shocks, because it works vertically and horizontally.

### DOUBLE SPRINGS

Some Premium and Classic saddles are equipped with double springs to guarantee a great suspension with their two complementary movements.

respiro

Leaving a bike in the sun or riding in hot weather can raise your saddle temperature to an uncomfortable level. To avoid unpleasant perspiration and discomfort, the Respiro line is designed with a ventilation channel and special materials to minimize saddle heat.
