

## PRODUCT RANGE 2018/2019

PROTECTS ANY  
BIKER AND HIS BIKE

**AXA** BIKE SECURITY

## PRODUCT RANGE 2018/2019

### A complete range to protect any biker and his bike

AXA is committed to optimally protect cyclist and bicycle on the road. AXA offers an extensive bicycle light and locks range. For each bike and cyclist AXA has the right locks and lighting to give you a safe feeling.

#### For every cyclist the right solution

##### AXA Bike Security

For more than 115 years, the company has made every effort to convert the latest requirements and developments into user-friendly, sustainable products. And thanks to our own production facilities in Europe, AXA can always guarantee constant high quality.

##### Shelf advise

For the bicycle dealer, we offer solutions for a well organized shop design. We like to help you to present your shop as well as possible. There are various display modules available which stimulate upselling.

##### We are always available

For information about our products or other issues please call one of our retail specialists: [+31 \(0\)318 536 220](tel:+3120318536220) or send an e-mail to: [info.axa.bike@allegion.com](mailto:info.axa.bike@allegion.com)

#### Index

#### AXA Product range 2018/2019

##### AXA Lock range

##### 4-23

The AXA lock range is very diverse and has a suitable lock for each bike. Our safe locks provide optimal protection for long and short term parking.

##### AXA Lighting range

##### 24-40

Visibility is an absolute must if you participate in traffic. The AXA lighting range complies with the latest requirements in the field of safety and light output.

##### AXA Chain protection

##### 41-45

AXA chain protection offers effective protection against dirt of the chain and of your clothes and is iconic for the design of a bicycle.

*“You opt for AXA, you opt for safety!”*

## FOR EACH BIKER THE RIGHT SECURITY

To help making the right choice AXA has classified her locks in security levels, with level 1 representing the lightest cable lock and level 25 representing the strongest chains with which you can also protect mopeds, scooters and motorcycles. These locks are mostly ART approved. This makes them suitable for closing a bike insurance.

### BASIC SAFETY

#### Safety level 1 to 6

Locks with safety levels 1 to 6 are ideal if your bicycle is parked for a short period in an area where the chance of theft is small.

### MEDIUM SAFETY

#### Safety level 7 to 10

Locks with safety level 7 to 10 are classified as good security for your bike and are suitable for bikes which are parked at school or at a crowded place with a lot of public.

### HIGH SAFETY

#### Safety level 11 to 15

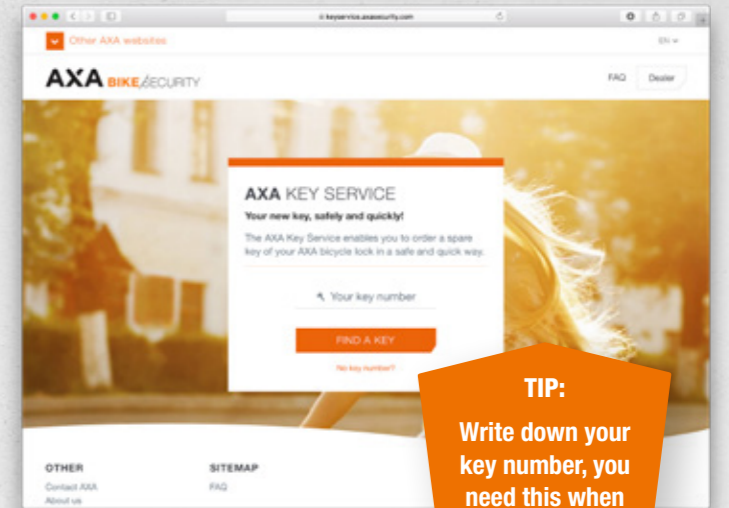

Do you live in a busy city or do you need to park your bike for a long time on theft sensitive places? Then choose a lock with safety level 11 to 15, the ultimate protection for your bike! These locks are often approved with a quality label, and are therefore suitable for closing a bike insurance.

## YOUR NEW KEY, SAFELY AND QUICKLY

### AXA Key service

It can happen that someone lost his bicycle key. This is not a problem! An extra key can be ordered via our key service website and will be delivered within a few days.

AXA is the only supplier that produces and sends keys in-house. As a result, we offer a fast service and security.

**TIP:**  
Write down your key number, you need this when you want to order a key.

## BIKE LIGHTS

In the AXA product range brochure different terms are used to term product features. In order to be able to make a good estimate of the product you need, it is therefore useful to know what these terms means. Below you can find a brief description of some product features.

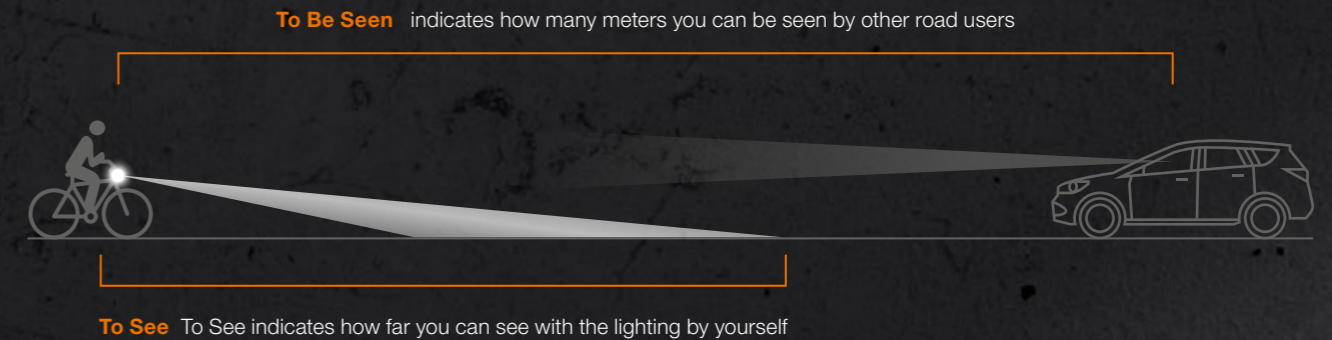

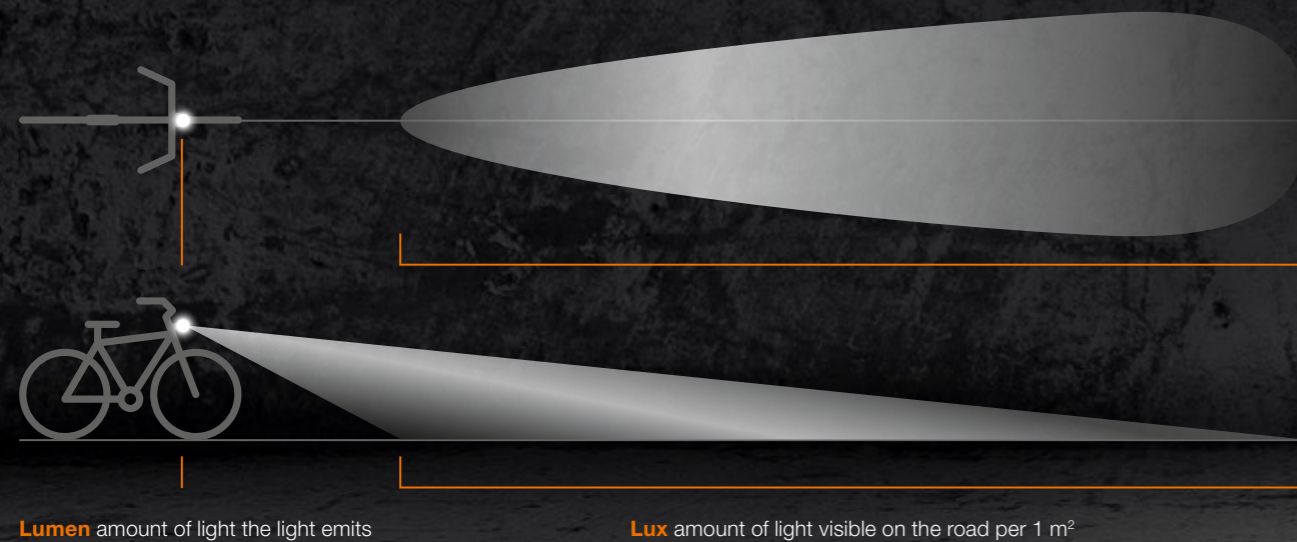

### What is the difference between Lux and Lumen?

In the lighting industry, there are two terms that can be used to indicate the brightness of a light, namely *Lux* and *Lumen*.

#### But what is the difference between them?

The difference between Lux and Lumen is the way the amount of light is measured. Lumen is the amount of light which the light emits from the source per time unit, regardless of where the light radiates. Lux, on the other hand, is the amount of light that falls on a surface, for example on a square meter.

At AXA lighting products the number of Lux is always mentioned. This term gives information on how much light is shining on the road and so how much sight you experience: extra safe!

### What means 'To See' and 'To Be Seen'?

When you are cycling and participating in traffic, it is important to both see well by yourself, as to be seen by other road users. For this reason in this brochure a distinction is made between "To See" and "To Be Seen".

"To See" indicates how far you can see with the lighting by yourself. This lighting is mainly used by cyclists who are often cycling on poorly lit roads and use the light to have a good view of the road.

"To Be Seen" indicates how many meters you can be seen by other road users. This lighting is especially useful when you are cycling in the city and want to be seen on well-lit roads.

### Extra safe on your way

To give you even more visibility on the road, AXA has different lamps in the assortment with steady light function and/or daytime safety light. These additional features offer you even more safety in traffic.

Different dynamo front and rear lights are equipped with the **steady light function** and it ensures that your bicycle light keeps shining up to 4 minutes when stopping for example at a traffic light. This provides additional visibility on the road, even if you don't ride!

AXA's **daytime safety light** not only ensures good visibility in the evening, but also good visibility during the day. AXA's daytime safety light offers you this security because during the day, two extra bright Led's make sure you remains visible even with sunlight.

## AXA IN THE PICTURE

Do you want to know how to adjust the code of a code lock, or do you want extra information about one of our product, watch one of our videos below. In addition have videos with tips for securing your bike and in which the difference in lights is explained.

Scan the QR code below and watch the videos. If you are interested to put the video on your own website, you can contact our customer service on telephone number **+31 (0)318 536 220**. We can send you the original video.

### Bicycle lighting

The importance of bicycle lighting is often underestimated. But without proper lights you are barely visible or not visible at all.

SCAN QR-CODE

### Theft prevention

Bicycle thieves get smarter every day. At AXA we work daily to always be 1 step ahead.

SCAN QR-CODE

### Explanation bicycle locks assortment

Are you fed up with your bike getting stolen? Then it's time for a good lock! But which one? AXA is here to help you.

SCAN QR-CODE

### AXA Fold

The AXA Fold is a compact folding lock with a modern design and comes with a convenient holder.

SCAN QR-CODE

### AXA Linq and Linq City

Strong until the last link! This high-quality chain provides (extra) security for your bike. The locks are extra strong locks as the links continue into the fastener.

SCAN QR-CODE

### AXA Foldable series

The AXA Foldable locks are incredibly easy to use. Each individual shackle can be folded in a different direction than the one before.

SCAN QR-CODE

### Explanation mounting flex mount strips

If a bicycle is not equipped with mounting points for a ring lock, the AXA Flex Mount makes it possible to mount any ringlock to the frame.

SCAN QR-CODE

### Set the code of the Rigid 120

The Rigid 120 is very user friendly as the 4-digit code can be set with a personal code.

SCAN QR-CODE

### Set the code of the Newton 95

The Newton is very user friendly as the 4-digit code can be set with a personal code.
